BRIANA SAUSSY

Juno Moneta Community Observance

Who Is Juno Moneta?

Probably a Holy Helper formed of two distinct Goddesses: Juno and Moneta.

Her temple overlooked the Roman Forum and was situated in the exact center of Rome.

Her temple became the place where all coins were stored and distributed and also where all ledger books were stored, marking the beginnings of the temples also serving as early Mints. Geese are her sacred animal and she was considered the Protectoress of the City as she warned the citizens about an upcoming earthquake and saved many lives.

She is also associated with the Sibyl and the mysteries that follow her.

What is our Community Observance for Her?

Every Thursday at 12noon central many of us gather in Spirit to honor this wonderful Holy Helper through prayer and an optional libation offering.

Here is the prayer:

Juno Moneta!

Juno Moneta!

Lady of Grace, Lady of Beauty

Lady of the gorgeous face.

Juno Moneta!

Juno Moneta!

We supplicate ourselves before you now, thank you for your oversight and guidance, requesting that you bless us in the areas of money and finances, especially in this current endeavor: (make whatever specific request you wish to make).

You, whose voice is like Thunder, who protects and guides from the center of the city, who holds the goose as most sacred, you who adores the jingling sound of coins, the keeper of books, the fierce and devoted Goddess who warns her beloved before any great danger, keep your eyes fixed upon our lives, bless us with all good things, and protect us always in ways we can understand and act on. And in exchange may we shall serve you and our city with words of nobility and devotion.
